

Class of Service

The Class of Service Administration module provides granular control at the extension level to access and set permissions of specific calling features of your PBX. These features include Outbound Routes, Feature Codes, Ring Groups, Queues, Conference Rooms, Voicemail Blast Groups and Paging.

The Class of Service module for Pulsar360, Inc. allows you to restrict extensions from dialing the following destinations of your PBX.

PULSAR360, INC.
Listen. Talk. Communicate.
